

Portfolio Rationalization Report

Enterprise Architecture | Application Portfolio Assessment | AI-Powered Advisory

Date of Issue: 31 May 2026 23:36

Scope: 1 Applications Assessed

Framework: TIME + 6R Rationalization Model

Classification: CONFIDENTIAL

1. Executive Summary

2. Portfolio Overview

1	\$100,000	0	\$0
APPLICATIONS ASSESSED	TOTAL ANNUAL SPEND	OVERLAP PAIRS	EST. ANNUAL SAVINGS

TIME Classification Breakdown

TIME Classification	Count	% Portfolio	Strategic Meaning
INVEST	1	100%	High strategic value -- continue and grow investment

6R Action Breakdown

6R Action	Count	% Portfolio	Description
RETAIN	1	100%	Strategic and healthy -- no immediate action required

5. Application Portfolio Detail

Application	Vendor	Category	Annual Cost	Users	Score	TIME	6R Action	Confidence
TestApp	SAP	ERP	\$100,000	-	8.0/10	INVEST	RETAIN	LOW

A. Appendix -- Methodology & Scoring Framework

TIME Framework

Tolerate: Application is functional but not strategic -- maintain without new investment.

Invest: High business value and strategic alignment -- continue and grow.

Migrate: Move to a better platform, cloud service, or modern replacement.

Eliminate: Decommission -- application is redundant, end-of-life, or low value.

Scoring Engine -- 7 Dimensions

Dimension	Description
Business Value	Category importance multiplied by criticality
Adoption Rate	User count mapped to a 0-10 utilisation score
Integration Depth	Number of integrations; highly integrated app
Vendor Support	Tier-1 vendor recognition and end-of-life sta
Cost Efficiency	Annual cost divided by user count (cost per u
Technical Health	Application age in years; penalised for end-o
Risk Score	Composite of EOL status, compliance requireme

6R Cloud Migration Model

Retain: No change required -- application is strategic and healthy.

Rehost: Lift-and-shift to cloud infrastructure with minimal code changes.

Replatform: Targeted optimisations to leverage managed cloud services.

Refactor: Significant redesign to cloud-native architecture.

Replace: Retire current application and adopt a SaaS or market alternative.

Retire: Decommission with no replacement required.
